ABOUT HOW TO MAKE OUR COMMUNITY
STRONGER

Kindly RSVP by Nov. 7 to Cora Oberst at 845-446-9575 ext. 1300

About the film: The child may not remember, but the body remembers.

Researchers have recently discovered a dangerous biological syndrome caused by abuse and neglect during childhood. As the new documentary *Resilience* reveals, toxic stress can trigger hormones that wreak havoc on the brains and bodies of children, putting them at a greater risk for disease, homelessness, prison time, and early death. While the broader impacts of poverty worsen the risk, no segment of society is immune. *Resilience*, however, also chronicles the dawn of a movement that is determined to fight back. Trailblazers in pediatrics, education, and social welfare are using cutting-edge science and field-tested therapies to protect children from the insidious effects of toxic stress—and the dark legacy of a childhood that no child would choose.

This screening is generously sponsored by
